

U.S. ELECTION ASSISTANCE COMMISSION

2016 Election Administration & Voting Survey

Statutory Overview

In order to better understand state laws governing Federal elections, the U.S. Election Assistance Commission, as part of its biennial Election Administration and Voting Survey, is collecting information on state election laws and procedures. These answers will help EAC to better understand the quantitative data relating to the 2016 general election that we are collecting from all U.S. states and territories.

EAC understands that responding to this Statutory Overview may require significant staff time on the part of your office. Please be assured that we have attempted to minimize the burden, and we appreciate your cooperation in this very important project.

As appropriate, please provide your state's legal citation for the responses to the questions beginning on the following page.

Please answer each question to the best of your ability. If a term or concept is ambiguous, please explain why. If a question is not applicable to your state, please explain why. If a definition or term lacks statutory reference in your state but is widely used in practice, please explain. If election procedures vary at the local level within your state, please explain these variations to the best of your ability.

The Statutory Overview data collection document has two columns below each question.

- On the left, we have provided you with the answer your state provided for the 2014 Statutory Overview. If there has not been a change in your state's laws or legal citation in the response to a question, please mark the box labeled **No Change since 2014** at the top of the left column.
- If the response has changed since 2014 – or your state has not answered this question previously for some reason— please mark the box labeled **Changed since 2014** at the top of the right column and then provide the new answer in the text box provided. If your response is too long to fit in the box, please make a note in the text box and place your response in the “Notes” page at the end of the document. Additionally, if a law was repealed in full, please answer “repealed in full” in the box.

If any of your state laws are currently enjoined or otherwise blocked from enforcement by a state or federal court or by executive decision, please specify.

The voter record of an individual who completed a voter registration application which has been input into the statewide registration system. An “active” voter record is printed on the polling place rosters and public information lists. An “active” record may be “challenged” in which case the election judge must ask the challenged individual sufficient questions to test that individual’s residence and right to vote. An “active” record may be an “incomplete registration” of a 1st time voter in the state who registered by mail and the county auditor is unable to verify the number provided on the application and for which the roster challenge notes the voter must “Show ID” before being allowed to vote. Secretary of State may share driver’s license and voter registration data with other state consortium.
Information on voters who have applied for a driver’s license or state id card with a different address may be forwarded to county auditors who shall update the voter’s record to the new address and mail a confirmation postcard to the voter, allowing the voter 21 days to notify the county auditor if the new address is not the voter’s address of residence.

2016 Response:

M.R. 8200.5100 Subp. 2 (A)(5)
Election Day registration proofs of residence were modified to allow a Veterans ID card as a photo ID allowed to be used in conjunction with allowed bills/statements.

UOCAVA application valid time period extended beyond the end of the calendar year:
UOCAVA applications are valid for elections from the time the application is received through the end of that calendar year or through the next scheduled state general election, whichever is later.

SECTION B: VOTER REGISTRATION

B1. Is your state's voter registration database system best described as a bottom-up, a top-down, or a hybrid? (Note: A bottom-up system generally uploads information retained at the local level and compiled at regular intervals to form the statewide voter registration list. A top-down system is hosted on a single, central platform/mainframe and is generally maintained by the state with information supplied by local jurisdictions. A hybrid is some combination of both systems described above.)

2016 Response:

Not applicable

B2. Please describe the process used in your state to move voters from the active list to the inactive list, and from the inactive list to the active list. Is a different process used for UOCAVA voters?

☒ **No Change since 2014**

☐ **Changed since 2014**

2014 Response:

M.S. 201.171 After the close of the calendar year, the secretary of state shall determine if any registrants have not voted during the preceding four years and change the status of those registrants to "inactive". Although not counted in an election, late or rejected absentee or mail ballots must be considered a vote for the purpose of continuing registration under this section, but is not considered voting history for the purpose of public information lists available under section 201.091, subdivision 4.

M.S. 201.171 "Inactive" registrants must register by completing a voter registration application before voting in any election.

An FPCA or FWAB submitted by UOCAVA voters that are eligible to be registered (i.e. not permanently/indefinitely overseas) is used to register the individual in the statewide registration system. Voter history is posted to UOCAVA voters if they are also an active registered voter, so a UOCAVA voter would not be made "inactive" if they've voted during the preceding four years.

2016 Response:

B3. Please describe your state's process for removing voters from the voter registration rolls (not merely moving them from active to inactive). Please include information regarding notices and confirmations. Are these procedures the same for UOCAVA voters?

☒ **No Change since 2014**

☐ **Changed since 2014**

2014 Response:

What is your definition of "removed"? No records are ever deleted. For Minnesota, making them inactive does remove them from the "rolls" as far as being on the polling place rosters or public information lists.

As a non-NVRA state, MN changes voters from active to inactive as noted in answer B2.

2016 Response:

B4. Can your state's voter registration database (or equivalent) share information electronically with your state's driver's license agency (for example, to match records or trace changes in address)? Can your voter registration database be similarly linked with databases in any other state or Federal agencies? Please describe these links, including any use of database matching to verify voter registration applications.

☐ No Change since 2014

☒ Changed since 2014

2014 Response:

Yes. Information is shared electronically between VR and Driver's License on a nightly basis. VR data of the day's activity is sent to Driver Vehicle Services (DVS). DVS compares with DL data and returns a file to OSS containing exact matches and potential matches. Exact matches are updated as verified, potential matches are queued for review by county auditors to determine if a match. Online VR data of individual submitting online application containing a driver's license number that could not be matched in the statewide registration system is sent to Driver Vehicle Services (DVS). DVS compares with Name, DOB and DL/State ID # and returns a file to OSS with matches that passed or failed. Online VR applications for passed matches are queued for review by county auditors. Individuals with online VR applications where a match failed receive an email notification. Records of individuals completing a DL application who also indicate they wish to be registered to vote are forwarded by

2016 Response:

Dept of Corrections information is shared electronically on a monthly basis. Corrections data are compared to the voter database and returned matches are queued for review by county auditors to add or remove challenges to the voter record.

Minnesota is an ERIC member and shares data electronically on a monthly basis. ERIC returned matches are queued for review by county auditors to update voter record addresses and to mark voter records as deceased.

B5. Please describe how your state uses National Change of Address (NCOA). What has been your state's experience with NCOA?

☒ No Change since 2014

☐ Changed since 2014

2014 Response:

OSS compares NCOA data with voter database monthly. If NCOA indicates a move within the state, the voter's address is updated and notice given allowing a 21-day reversal period. If NCOA indicates a move out of the state, the voter record is flagged to be inactivated following a notice and 21-day period for voter to reply to retain registration status. If any nonforwardable mailing from an election official is returned as undeliverable but with no forwarding address, a challenge is applied to the voter record. Upon return of a second mailing at least 60 days after the return of the first mailing, the registrant's status is made inactive.

2016 Response:

B6. Please describe your state's voting eligibility requirements as they relate to individuals with a felony conviction. (For example, are convicted felons allowed to vote while in prison or while on parole or probation? Are voting rights automatically restored or does the individual have to apply for a pardon, certificate of eligibility or other similar certificate? Does an individual whose voting rights have been restored have to produce documentation of his/her status when registering to vote?)

☒ **No Change since 2014**

☐ **Changed since 2014**

2014 Response:

To be eligible to vote if convicted of a felony, the individual's sentence must have expired (been completed) or have been discharged from their sentence. Voting rights are automatically restored upon the expiration of the sentence. They simply register and vote.

2016 Response:

B7. Does your state currently use the Internet in any way to facilitate voter registration? If yes, please describe how your state allows voters to use the Internet in the registration process (e.g., entire registration completed online; completed online but then must be printed, signed, and mailed by voter, etc.).

☒ **No Change since 2014**

☐ **Changed since 2014**

2014 Response:

Voter registration application form is available online. Information can be input into the form online, but it must be printed, signed and returned by the individual to county auditor or secretary of state. Individuals may submit an online application if they provide an email address and provide either a MN-issued driver's license number, MN-issued state identification card number, or the last 4 digits of their social security number. Name, DOB and DL/State ID # must match existing information in a government database associated with the applicant's driver's license, state identification card number, or Social Security number before the application may be transmitted electronically to the county auditor for processing.

C3. Does your state provide for in-person early voting? If so, how is early voting defined? When early voting is used, are the ballots counted at the precinct or at a central location? How are these votes reported?

☐ **No Change since 2014**

☒ **Changed since 2014**

2014 Response:

MN does not provide early voting, only no-excuse absentee voting either in-person or by mail.

2016 Response:

Minnesota provides both in-person and by mail no-excuse absentee voting during the 46 days before the election.

During the 7 days before the election, the county auditor may alternatively offer in-person absentee voters the option to place their ballot directly into a vote tabulator rather than sealing the ballot in envelopes.

Absentee ballots are counted at a central location, by a county or municipal ballot board. Absentee votes are combined with polling place results and reported as one total per precinct in the canvass.

Minnesota reports in-person absentee voters as early voting in EAVS.

C7. Please describe your state's laws regarding post-election audits, if any. A post-election audit refers to hand-counting votes on paper records and comparing those counts to the corresponding vote counts originally reported, as a check on the accuracy of election results, and resolving discrepancies using accurate hand counts of the paper records as the benchmark.

If your state has post-election auditing, consider including in your response information such as the unit being audited (e.g., precincts, machines); the sampling method (e.g., fixed percentages); whether there is a specific trigger for the audit; the location of the random selection (e.g., state, county); and the races that can be audited.

☒ **No Change since 2014**

☐ **Changed since 2014**

2014 Response:

A post election review of voting systems will take place for specific precincts after every state general election. At the canvass of the state primary, the county canvassing board in each county must set the date, time, and place for the post election review of the state general election. The county auditor must notify the OSS when these selections have been made. The votes cast for President or Governor; United States Senator and United States Representative must be reviewed for the precincts selected by lot by the county canvassing board. A review of an office is not required if it is subject to a recount. The county auditor is the post election review official unless the auditor designates the municipal clerk as the review official within 24 hours after the canvass of the state general election. The post election review official may conduct post election review of the votes cast for additional offices.

Number of precincts to be selected:

The county canvassing board of a county with fewer than 50,000 registered voters must conduct a review of a total of at least two precincts.

The county canvassing board of a county with between 50,000 and 100,000 registered voters must conduct a review of at least three precincts.

The county canvassing board of a county with more than 100,000 registered voters must conduct a review of at least four precincts or 3% of total number of precincts in the county, whichever is greater.

One precinct selected in each county must have had more than 150 votes cast at the general election.

The county auditor must notify the OSS of the precincts that have been chosen for review, the time and place of the review as soon as the decision is made.

If the selection of precincts has not resulted in the selection of at least four precincts in each congressional district, the OSS may require counties to select additional precincts by lot.

The review is a comparison of a hand tally of the voted ballots cast by eligible voters in the precinct with the reported results certified by the county canvassing board. The comparison of the results from the voting system and the hand count must be accurate to within one-half of one percent or two votes in a precinct where 400 or fewer voters cast ballots. This does not include votes marked outside the vote
